

# Pankti Bhalani

8574079390 | panktibhalani@gmail.com | <https://github.com/pankti11/>

## EDUCATION

<b>Northeastern University</b>	2016 – 2018
Master of Science in Computer Science	GPA: 3.7
Relevant Courses: Web-Development, Algorithm, Program-Paradigm-Design, Information-Retrieval	
<b>Dharmsinh Desai University</b>	2011 – 2015
Bachelor of Technology in Computer Engineering	GPA: 8.2
Relevant Courses: Data-Mining, Database-Management, Service-Oriented-Architecture, Software-Engineering, Artificial-Intelligence, Data-Structure-and-Algorithm, Web-Development-in-.NET	

## TECHNICAL KNOWLEDGE

<b>Languages:</b>	python, java
<b>Web Technologies:</b>	
<b>Software:</b>	
<b>Software:</b>	

## WORK EXPERIENCE

<b>Philips, Boston, MA</b>	08/2015 – 02/2016
<b>Software Developer COOP</b>	
<ul style="list-style-type: none"><li>Analyzed historic data for NRHL from various cloud storage such as Loggly, New Relic, available APIs and Database storage (ElasticSearch and ElasticSearch APIs)</li><li>Generated trend analysis for past events using various environment for statistical computing and graphics</li><li>Translated business needs into actionable modeling strategy and data mining goals</li><li>Implemented various machine learning algorithms using Scala on Apache Spark platform, R programming language for initial mock data, various submodules in python with complete automation process using Jenkins, Docker and Ansible 2.0</li></ul>	
<b>ESSAR POWER, Hazira, India</b>	08/2015 – 02/2016
<b>Software Engineer Intern</b>	
<ul style="list-style-type: none"><li>Developed and Designed a Transmission Tower Management System for EPTCL (ESSAR POWER TRANSMISSION COMPANY LIMITED) using technologies C#, ASP.NET, SAP Crystal Reports, Google Maps API, Microsoft SQL Database and Open XML SDK which manages data for technical, legal, land ownership and maintenance details.</li><li>Implemented features to export reports to EXCEL, update data through EXCEL, view Tower Location in Google Maps and notify users through email for any updates or insertion in modules.</li><li>Corresponded with clients to gather the requirements and an overview of the functionalities for the application.</li></ul>	

## PROJECT

---

### Social Media Application for Photos (PHP JavaScript MySQL)

- Designed and developed a website which includes features like photo-editing, commenting, liking the photo as well as photo-sharing using PHP, JavaScript and MySQL.

### Search Engine Implementation (NLKT Python)

- Developed an indexer to store the token of 3000 Documents.
- Implemented BM25, cosine and tf-idf similarity model to extract top 100 documents for a query.
- Expanded the Query Using Pseudo Relevance Model and obtained 20% better search results.
- Implemented MAP, MRR, precision-k and recall-k measures to evaluate given document-rank file of a different IR model and created Precision/Recall curves for visualization.

### Web Crawler (Python Beautiful Soup)

- Designed and implemented a web crawler to perform focused and un-focused crawling for the given seed page and a depth level using Python and Beautiful Soup.

### Movie Rater (Java POS-Tagger Senti-word SQL)

- Researched seven papers to develop the website which rates the movies based on the comments given by the users using Unsupervised Feature Based Sentimental Analysis using JAVA, Pos-Tagger, Senti-Word and SQL.

## WORK EXPERIENCE

---

**Philips, Boston, MA**

08/2015 – 02/2016

### **Software Developer COOP**

- Analyzed historic data for NRHL from various cloud storage such as Loggly, New Relic, available APIs and Database storage (ElasticSearch and ElasticSearch APIs)
- Generated trend analysis for past events using various environment for statistical computing and graphics
- Translated business needs into actionable modeling strategy and data mining goals
- Implemented various machine learning algorithms using Scala on Apache Spark platform, R programming language for initial mock data, various submodules in python with complete automation process using Jenkins, Docker and Ansible 2.0
