### **EDUCATION**

#### **Northeastern University**

2016 - 2018

Master of Science in Computer Science

GPA: 3.7

Relevant Courses: Web-Development, Algorithm, Program-Paradigm-Design, Information-Retrieval

#### **Dharmsinh Desai University**

2011 - 2015

Bachelor of Technology in Computer Engineering

GPA: 8.2

Relevant Courses: Data-Mining, Database-Management, Service-Oriented-Architecture, Software-Engineering, Artificial-Intelligence, Data-Structure-and-Algorithm, Web-Development-in-.NET

## TECHNICHAL KNOWLEGDE

Languages:

python, java

Web Technologies:

Software:

#### **WORK EXPERIENCE**

# Philips, Boston, MA

08/2015 - 02/2016

#### **Software Developer COOP**

- Analyzed historic data for NRHL from various cloud storage such as Loggly, New Relic, available APIs and Database storage (ElasticSearch and ElasticSearch APIs)
- Generated trend analysis for past events using various environment for statistical computing and graphics
- Translated business needs into actionable modeling strategy and data mining goals
- Implemented various machine learning algorithms using Scala on Apache Spark platform, R
  programming language for initial mock data, various submodules in python with complete
  automation process using Jenkins, Docker and Ansible 2.0

# ESSAR POWER, Hazira, India Software Engineer Intern

08/2015 - 02/2016

- Developed and Designed a Transmission Tower Management System for EPTCL (ESSAR POWER TRANSMISSION COMPANY LIMITED) using technologies C#, ASP.NET, SAP Crystal Reports, Google Maps API, Microsoft SQL Database and Open XML SDK which manages data for technical, legal, land ownership and maintenance details.
- Implemented features to export reports to EXCEL, update data through EXCEL, view Tower Location in Google Maps and notify users through email for any updates or insertion in modules
- Corresponded with clients to gather the requirements and an overview of the functionalities for the application.

# **PROJECT**

#### Movie Rater (Java POS-Tagger Senti-word SQL)

 Researched seven papers to develop the website which rates the movies based on the comments given by the users using Unsupervised Feature Based Sentimental Analysis using JAVA, Pos-Tagger, Senti-Word and SQL.

#### Social Media Application for Photos (PHP JavaScript MySQL)

 Designed and developed a website which includes features like photo-editing, commenting, liking the photo as well as photo-sharing using PHP, JavaScript and MySQL.

#### **Search Engine Implementation (NLKT Python)**

- Developed an indexer to store the token of 3000 Documents.
- Implemented BM25, cosine and tf-idf similarity model to extract top 100 documents for a query.
- Expanded the Query Using Pseudo Relevance Model and obtained 20% better search results.
- Implemented MAP, MRR, precision-k and recall-k measures to evaluate given document-rank file of a different IR model and created Precision/Recall curves for visualization.

#### Web Crawler (Python Beautiful Soup)

 Designed and implemented a web crawler to perform focused and un-focused crawling for the given seed page and a depth level using Python and Beautiful Soup.
